Document No.

This document is to confirm that the inspection and evaluation of the following products

**Biogreen 988**

produced and distributed by the a.m. company came to the following result

**Most of the ingredients are listed in annex II of EU Regulation No. 2092/91. A part of the ingredients of the a.m. products is not listed in this annex II. In relation to other products of the positive list in annex II, these substances can be considered as equivalent.**

**Therefore the final product can be considered as a product allowed in organic agriculture, referring to be analogous to the requirements of EU Regulation No. 2092/91.**

Anyhow, it has to be reminded that – although BCS confirms the conformity of the products with the requirements of EU Regulation No. 2092/91 – due to a missing uniform interpretation of the term "equivalency", every state authority in the EU has got the right to apply its own criteria to this respect.

The inspection and evaluation of the proceeding of production was realized by BCS Öko-Garantie GmbH, Nuremberg, Germany. BCS is an EU-accredited inspection and certification body, controlled by 18 German state supervising authorities.

This confirmation does not constitute any guarantee of product quality. It only confirms that the use of these products can be considered as equivalent to the inputs listed in annex II of EU Regulation No. 2092/91.

It has to be taken into consideration that the official registration in every country where the products should be sold is not covered by this confirmation. It remains the obligation of the distributing company to carry out the respective legal steps for the official registration of these products.
