NOTE: This Report is issued subject to the conditions set out overlaid. The samples mentioned in this report were submitted by the client. SISIR's officers are not involved in the sampling and selection. SISIR therefore assumes no responsibility for the accuracy of information on the brand name, model number, origin of manufacture, consignment or any other information supplied.

Subject: Evaluation of Disinfectant for Bacteriocidal Activity

Tested for: Taylor Stanley (S) Pte Ltd
City Industrial Building #07-07
71 Tannery Lane
Singapore 1334

Attn: Mr B A Yeo

Description of Sample: One sample consisting of 1 x 1 litre of "Kits 3.2.8 Concentrate The All-Powerful Cleaning And Disinfecting Formula" was submitted on 1989-09-29.

Method of Test: As requested, the tests were carried out as follows :

Test organisms used:

Bacillus cereus
Coliforms (including Escherichia coli)
Pseudomonas aeruginosa
Salmonella choleraesuis
Staphylococcus aureus

The original sample was diluted with distilled water in the ratio of 1:10, 1:20 and 1:50 for the tests.

Tests were carried out independently for each organism.

1ml of each bacterial suspension was added to 9ml of the diluted disinfectant and the mixture was allowed to stand for 1, 3 and 5 minutes.

Richard Lim
